Subject: Language & Creation

Title: Father of Lights

Part 2: What is Existence?

Genesis 1:20-31 – the creation narrative day 5 and 6

We must remember that the narrative we read within the account of the Genesis was written after the fact, when Jehovah had enacted a covenant with Abraham to bring about the restoration of mankind through the promise. Moses was given the task of bringing the Torah to the people of Israel, since they had rejected his voice at Sinai.

Creation itself speaks to the Existence!

What is DNA?

The Hebrews said we have Abraham as our Father, but it was the One who Exists that set-in-motion the Hebrew nation and the chosen people through the child of promise. Abraham and Sarah did what was necessary for life to be formed in the body, but it was the Father who gave breath to Isaac, and it is what we miss in the narrative, that it was the Father who brought life to the chosen people through a promise by faith. Without Jehovah there would never have been a chosen people through Abraham because there was no life in Sarah's womb other than what the Father created.

Genesis 2:1-3

The Sabbath or Seven?

Why was this said here to open the explanation of the narrative that describes in more detail the physical creation of the "man"?

A cessation of physical work. Remember that man was already in place. So, what is the blessing here that speaks to what Jehovah was setting in place?

Genesis 2:4-8

What is man that you are mindful of him? Psalm

We have always asked the question what makes man unique? Or have determined that we are unique because we in the Christian world believe that we are better than everyone else because God chose to redeem us!

- The nature of man is not about uniqueness, but his generation.
- Setting his place within the Kingdom of Jehovah as a son.
- The differentiation of existence that gives us the ability to hold dominion or carry the Word of Jehovah within the earth to keep and protect the order, the light, form, and function of the world around us.
